

mFuga

With mFuga2, Sonetas delivers a revised version of the original mFuga. mFuga2 is a mobile and online version of Fuga, with which the vet can enter data during consultations and sales on the move. With your smartphone or tablet you can use mFuga2 to quickly consult the agenda, enter consultations, view customers or patients, change and add them.

For mFuga2 it is sufficient to click on the icon 'mFuga2' in Fuga. You can then save the webpage on the home screen of your smartphone. You do not have to install an application from the app shop.
